The Mini Bulk system showcases UV resistant, stainless steel outer panels and roof that are insulated for hot to cold climates. Every part and component are certified ISO 22241 DEF compatible to ensure you never have to worry about contaminants compromising the chemistry. This system is pre-wired for easy installation and can hold and expand in 500 gallon increments up to 2,000 gallons. Features an automated fill-port valve (to prevent overfilling), dry-break adapter fill port, high-level indicator and weather-tight control panel mounted on front wall. The Mini Bulk is designed to fit on a fuel island. Includes lockable fill port door and a ½ HP submersible DEF pump. Also includes forklift pockets for quick relocation.

### TECHNICAL DATA

#### 500 GALLON (1 TANK)
- Height: 107”
- Width: 36”
- Length: 48” + 8” control box
- Weight (empty): ~1,035 lbs
- Weight (full): ~5,600 lbs
- Flow Rate: ~15 gpm max**
- System Pressure: 60 psi (36 operating)
- Standard Voltage: 120V 60 Hz (240V optional)
- Maximum Pump Amperage: 9A (20A circuit)
- Maximum Heater Amperage: 12A (20A circuit)
- ISO 22241-3 & 22241-1 Standards: Complies
- Additional Standards Compliance: Complies to NFPA 30, 30A, 70 if installed properly (refer to local codes)

#### 1000 GALLON (2 TANKS)
- Height: 107”
- Width: 36”
- Length: 96” + 8” control box
- Weight (empty): ~1,900 lbs
- Weight (full): ~11,000 lbs
- Flow Rate: 15 gpm max**
- System Pressure: 60 psi (36 operating)
- Standard Voltage: 120, 60 Hz (240V optional)
- Maximum Pump Amperage: 25A (30A circuit)
- Maximum Heater Amperage: 23A (30A circuit)
- ISO 22241-3 & 22241-1 Standards: Complies
- Additional Standards Compliance: Complies

### FEATURES
- Unit fits on all standard width fuel islands
- Polished stainless steel outer panels and roof
- High density polyethylene tank with no bottom or side-wall penetrations
- Keeps fluid safe from environmental hazards
- Easily relocatable
- Integrates with any brand commercial, fleet or retail dispenser
- 120V design with a 1/2 HP submersible DEF pump
- Pre-wired electrical components
- Installation anchor kit
- Lockable fill-port
- High level indicator with overfill protection valve
- Automatic low lever shut down protection

### BlueDEF FLEET DISPENSER
- Rugged carbon steel powder coated cabinet
- Front locking access door
- 25 FT DEF hose reel with DEF hose
- Filter housing assembly
- Ball stop with four-way roller assembly
- Digital inline DEF flow meter
- DEF Stainless steel automatic nozzle with swivel
- Nozzle dock
- Heat option available

### OPTIONS/ADD ONS
- Level display
- Heat package
- Dispensing Cabinet with filter
- Remote inventory management
- Advertising rails
- 3/4 HP or 1 HP submersible pump
