

PEAK[®]

ARCTIC[®]

WINTER BLADE

DESCRIPTION:

PEAK[®] Arctic Winter Wiper Blades are different from other conventional wiper blades because they feature a fully enclosed wiper frame. This feature keeps out snow, ice, and sleet while helping to combat severe weather your wiper blades would normally be exposed to. They also feature a heavy duty frame which will not twist, warp or crack throughout winter's harsh elements. The extra-large rubber squeegee covers more surface area for a more complete wipe.

BENEFITS:

- Heavy-duty steel frame construction will not twist, warp, or crack
- Fully enclosed wiper frame keeps out ice, sleet, and snow
- Heavy-duty design rated for severe weather conditions
- Extra large rubber wipe surface for improved performance
- Re-sealable packaging helps minimize damages
- Trilingual packaging (English, Spanish, and French Canadian)
- Available in select sizes from 16" to 28"

APPLICATION:

Application information varies with your vehicle's year, make and model. Be sure to review your owner's manual, your retailer's application data or look up your vehicle's wiper blade size(s) and arm information at www.peakauto.com.
